

Portland Audubon Summer Camp COVID Policies

With the health and safety of our members and community in mind, Portland Audubon has created a camp experience to reduce risk of COVID-19 transmission. We recognize and acknowledge these policies and practices will not eliminate risk, but rather allow us to engage in camp with reduced risk. We will continue to review any updated guidance from the Oregon Health Authority and will be adjusting our guidelines based on their recommendations for the summer camp season.

Some of our guidelines that we would like to share with you are:

- Participants must sign a COVID-19 acknowledgement of risk waiver during the online registration process.
- At this time, campers will be asked to wear well fitting masks while inside, KN95 or higher preferred.
- Masks are optional while outside.
- Camps will take place primarily outside. Inside camp time will be reserved for time with specimens or art projects or during inclement weather. While campers are indoors for activities, staff and campers will be masked and the room will be well ventilated, with multiple windows open and an air purifier on. Please view our [COVID Management Plan](#) for more details.
- For mobile camps, masks will be required while riding in the van or bus.
- Proof of full vaccination will be required for all overnight camps.
- A [rapid 2-hr PCR Test](#) (select 2 hr PCR in the filter on Curative's website) is required 48 hours ahead of Expedition Camps (San Juans, Redwoods, and Alpine Lakes Backpacker). Please submit negative test results to camp@audubonportland.org.
- All campers and their families are required to report to Audubon any exposure to someone with COVID-19 symptoms or to person(s) who have tested positive for COVID-19. Symptoms can include fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion, nausea/vomiting, diarrhea.
- All campers and families will monitor for symptoms, including taking temperature every morning before camp drop off.. Any camper with a fever or COVID-19 symptoms will be required to contact us and not attend camp.
- If a fully vaccinated camper has been exposed to COVID-19 and is not experiencing symptoms they may attend camp but we require that they wear a KN95 mask inside as well as outside for 5 days following exposure. If your camper is not vaccinated and exposed, please refer to [current CDC quarantine calculator](#).
- If a camper tests positive for COVID-19 and is in isolation you may elect to receive a prorated credit toward a future program, or a prorated refund minus a 10% administrative deposit.

We ask that any camper who tests positive for COVID-19 within two weeks after attending camp please let us know. If this occurs, we will inform all participants in that camp that they may have come in contact with an individual who has tested positive for COVID-19. The name of the camper will not be shared.

We're sending our heartfelt thanks to you for your continued support of Portland Audubon and are excited for our summer camp season!
